The Dutch in the Caribbean and on the Wild Coast 1580–1680: Communities, Cultures, and Commerce 1580–1620. The books in the Florida and the Caribbean Open Books Series demonstrate the University Press of Florida’s long history of publishing Latin American and Caribbean studies titles that connect and extend Florida, highlighting the connections between the Sunshine State and its neighboring islands. Books in this series show how early explorers found and settled Florida and the Caribbean. They tell the tales of early pioneers, both foreign and domestic: They examine topics critical to the area such as travel, migration, economic opportunity, and tourism. They look at the growth of Florida and the Caribbean and the attendant pressures on the environment, culture, urban development, and the movements of peoples, both forced and voluntary. The Florida and the Caribbean Open Books Series gathers the rich data available in these architectural, archaeological, cultural, and historical works, as well as the topographies and naturalists’ sketches of the area in the prior to the twentieth century, making it accessible for scholars and the general public alike. The Florida and the Caribbean Open Books Series is made possible through a grant from the National Endowment for the Humanities and the Andrew W. Mellon Foundation, under the Humanities Open Books program.

**Direct Democracy** -Scott Henkel 2017-05-25 Winner of a 2018 C. L. R. James Award for a Book Published for Academic or General Audiences from the Working-Class Studies Association Beginning with the Haitian Revolution, Scott Henkel lays out a literary history of direct democracy in the Americas. Much research considers direct democracy as a form of organization fit for worker cooperatives or political movements. Henkel reinterprets it as a type of collective power, based on the massive slave revolt in Haiti. In the representations of slaves, women, and workers, Henkel traces a history of power through the literatures of the Americas during the long eighteenth century. This book shows how slavery, revolution, and freedom produced a new form of democratic politics.

Slavery and the British Country House -Andrew Hans 2013 In 2007 English Heritage commissioned initial research into links with transatlantic slavery or its abolition amongst families who owned properties now in its care. This was part of the commitment by English Heritage to commemorate the bicentenary of the abolition of the slave trade. This research extends from the dramatic slave trade to the more subtle forms of coercion that shaped the lives of the enslaved. This work explores how estate history might be reconceptualized in the light of their slavery links and how such links have been and might be presented to visitors. Since then the conference papers have been updated and reordered into a cutting edge volume which represents the most current and comprehensive consideration of slavery and the British country house as yet undertaken.

A Global History of Convicts and Penal Colonies -Clare Anderson 2018-05-17 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburyacademic.com. It is funded by the University of Leicester. Between 1415, when the Portuguese first used convicts for colonization purposes in the North African enclave of Cufa, to the 1860s and the dissolution of Sultan's galûps, global powers including the Spanish, Dutch, Portuguese, British, Russian, Chinese and Japanese transported millions of convicts to forts, penal settlements and penal colonies all over the world. A Global History of Convicts and Penal Colonies builds on specific regional archives and literature to write the first global history of penal transportation. The essays explore the idea of penal transportation as an engine of global change, in which political repression and forced labour combined to produce long-term impacts on economy, society and identity. They investigate the varied and interconnected means convicts took to resist and understand the relationship of these convict flows to other forms of punishment, unfree labour, military service and indigenous incarceration. They also explore the lived worlds of convicts, including work, culture, religions and intimacy, and convict experience and agency.

Traumatic Tides -Lisa Kazmer 2017-09-14 Traumatic Tides: British Nationhood and National Trauma in Nineteenth-Century Literature explores intersections of nationalism and trauma in Romantic and Victorian literature from the emergence of British nationalism through the height of the British Empire. From the national tales of the early nineteenth century to the socially incisive realist novels that emerged later in the century, nationalism is inseparable in this literature, as much current scholarship acknowledges. Nineteenth-century national trauma, however, has only recently begun to be explored. Taking as its starting point the unsettling effects of nationalism, the essays in this collection explore the voices underlying nationalism, particularly in regard to subject identity. National violence—imperialism, colonialism and warfare—necessarily grounds national formations in deep-layered trauma. As such narratives are monitored, such truth narratives are nationalized as well as in political policy, exposed in memoirs of historical and analytical studies to reveal psychological, political, social and individual trauma. This exploration of violence in the construction of national ideology in nineteenth-century Britain rethinks our understanding of cultural memory, national identity, imperialism, and colonialism, recent threats of Romantic and Victorian study in nineteenth-century literature.
